

Operation of the remote control

	Turn the trained controller on and off. Switch the remote control to sleep mode.
	Swipe your finger across the color wheel or tap anywhere to set the desired default color.
	Short print gives you 24 kinds of static RGB colors. Long press gives you continuous color adjustment
	Pressing it briefly starts the next dynamic mode. By long pressing for 2 seconds, all 10 color programs are played in loop.
	To Adjust the speed, press briefly for the 10-step setting. Press 2 seconds to set the default speed. If the stand colour is selected: Increase/decrease the color saturation in 10 levels by briefly pressing. By long pressing for 1 to 6 increase/ decrease the color saturation steplessly.
	Increase/decrease the brightness in 10 levels by briefly pressing. By long pressing for 1 to 6 increase/ decrease the brightness steplessly.
	By pressing it briefly, you get the red, green or blue color. Press for 1-6 seconds to freely adjust the brightness of each RGB channel to mix your own desired color.
	Press briefly to turn the white channel on or off. By long pressing for 1 to 6 increase/ decrease the brightness steplessly.
	Press briefly to recall a previously saved scene (brightness / speed / color / color sequence). Long press for 2 seconds to save the currently set scene (brightness / speed / color / color sequence). The control LED will turn green when saving is successful.

- Crafted by a leading German company specializing in sauna and wellness lighting.
- Built to endure **high heat and humidity** with consistent performance—key for sauna environments.
- Designed for seamless installation (e.g., bench or backrest), lighting complements the natural aesthetics of a cedar sauna while maintaining a clean, minimal look
- The lighting is recognized for its **innovative LED control technology** and **durable construction**, ensuring both visual beauty and long-lasting reliability.
- **Sets the Perfect Mood**
The right light transforms the room—not only enhancing safety and visibility but also creating a calming, immersive ambiance that invites relaxation.
- **Enhances Wood Charm**
Soft, well-placed LED lighting lets wood grains and textures glow—turning wood into an experience, not just a material.
- **Light That Lasts**
With superior heat resistance and industrial-grade quality, maintain brightness and warmth through countless sauna sessions—no flicker, no fade, no worries.

Imagine stepping into your sauna after a long day. The heat wraps around you, and gentle lighting casts golden reflections on the cedar walls—creating a sanctuary that's both **physically restoring** and **emotionally calming**. That's the kind of experience Saunalumin lighting brings. This isn't just illumination—it's the **silent companion to relaxation**, turning a trip to the sauna into a moment of living art.
